Canadian Manuscript Report of Fisheries and Aquatic Sciences No. 2164

Pêches et Océans Fisheries and Oceans

Canada

Rapport manuscrit canadien des sciences halieutiques et aquatiques

Les rapports manuscrits contiennent des renseignements scientifiques et techniques qui constituent une contribution aux connaissances actuelles, mais qui traitent de problèmes nationaux ou régionaux. La distribution en est limitée aux organismes et aux personnes de régions particulières du Canada. Il n'y a aucune restriction quant au sujet; de fait, la série reflète la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports manuscrits peuvent être cités comme des publications complètes. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports manuscrits sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1 à 900 de cette série ont été publiés à titre de manuscrits (série biologique) de l'Office de biologie du Canada, et après le changement de la désignation de cet organisme par décret du Parlement, en 1937, ont été classés comme manuscrits (série biologique) de l'Office des recherches sur les pêcheries du Canada. Les numéros 901 à 1425 ont été publiés à titre de rapports manuscrits de l'Office des recherches sur les pêcheries du Canada. Les numéros 1426 à 1550 sont parus à titre de rapports manuscrits du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 1551.

Les rapports manuscrits sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

Canadian Manuscript Report of Fisheries and Aquatic Sciences

Manuscript reports contain scientific and technical information that contributes to existing knowledge but which deals with national or regional problems. Distribution is restricted to institutions or individuals located in particular regions of Canada. However, no restriction is placed on subject matter, and the series reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Manuscript reports may be cited as full publications. The correct citation appears above the abstract of each report. Each report is abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1–900 in this series were issued as Manuscript Reports (Biological Series) of the Biological Board of Canada, and subsequent to 1937 when the name of the Board was changed by Act of Parliament, as Manuscript Reports (Biological Series) of the Fisheries Research Board of Canada. Numbers 901–1425 were issued as Manuscript Reports of the Fisheries Research Board of Canada. Numbers 1426–1550 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Manuscript Reports. The current series name was changed with report number 1551.

Manuscript reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

ABSTRACT

Williamson, A. M. 1992. Historical lobster landings for Atlantic Canada, 1892-1989. Can. Manuscr. Rep. Fish. Aquat. Sci. 2164: iii + 110 p.

Lobster landings for Atlantic Canada, from 1892 through 1989, have been summarized and tabulated for geographical areas of interest to persons involved with the lobster fishing industry. Although most data were acquired from Statistics Canada publications, not all geographical areas were readily accessible in the published format. All landings have been converted to metric tons. Also included in the report is a list of names and addresses of personnel in the Statistics Branch of each region from whom current lobster landings statistics can be acquired.

RÉSUMÉ

Williamson, A. M. 1992. Historical lobster landings for Atlantic Canada, 1892-1989. Can. Manuscr. Rep. Fish. Aquat. Sci. 2164: iii + 110 p.

Les débarquements de homards du Canada Atlantique, à partir de 1892 jusqu'à 1989, ont été résumé et classifié sous forme de tableaux et figures par région géographique d'interêt pour les personnes impliquées dans l'industrie de la pêche du homard. Malgré que la plupart des statistiques proviennent du Bureau des Statistiques du Canada, elles n'étaient pas toutes disponibles par régions géographiques dans un format aisément accessible. Tous les débarquements ont été converti en tonne métrique. Également inclus dans le rapport est une liste de noms et d'addresses de personnes des Bureaux des Statistiques de chaque région, auprès desquelles on peut obtenir les plus récentes statistiques sur les débarquements de homards.

INTRODUCTION

This report summarizes lobster landings for Atlantic Canada, from 1892 through 1989, by geographical areas of interest to persons involved with the lobster fishing industry. Landings data for some of the geographical areas used in this report are not readily accessible from Statistics Canada publications.

HISTORICAL DATA BASE

Lobster landings published by Statistics Canada (formerly the Dominion Bureau of Statistics) from 1892-1976 were typically recorded in pounds, whereas lobster landings for all subsequent years were recorded in metric tons or kilograms. Hence, landings data for 1892-1976 have been converted to metric tons.

Information on total lobster landings for Canada (Fig. 1, Table 1) includes Newfoundland lobster landings from 1893 through 1989, even though data published by Statistics Canada did not include lobster landings from Newfoundland until 1956, after Newfoundland had joined Confederation. The original source of data for the Province of Newfoundland, from 1892 through 1955, was not recorded and is unknown to the author.

Lobster landings from 1892-1896 for the Maritime Provinces and for the Province of Quebec were derived from Marine and Fishery Reports issued by the Dominion Bureau of Statistics[1] where they had been recorded partly as numbers of 1-lb cans of lobster, and partly as round weights of live lobsters. The published data for weights of cans have been transformed to equivalent weights of live lobsters using a conversion factor of 5 (derived from an estimated 20% yield factor) supplied by D.G. Robinson (Clearwater Fine Foods, P.O. Box 310, Bedford, N.S., B4A 2X3, pers. commun.). This factor was based on information on numbers of lobsters per can specified in Fishery Inspectors' Reports contained in the Marine and Fishery Reports 1892-1916[1].

Data for 1897-1917 were extracted from a summary table published in Fisheries Statistics, 1917[2]. In this report, lobster landings data were presented partly as live lobsters, and partly as 1-lb cans. The latter were converted to live lobster weights using the conversion factor of 5 as specified above.

All data from 1897-1976 were taken from the Fisheries Statistics of Canada Annual Reviews[3], with the exception of landings for the years 1969-76, which were taken from December Monthly Reviews[4], due to the fact that the species breakdown by Sea Fisheries Districts in the Annual Reviews for those years grouped all "Molluscs and Crustaceans" without further breakdown to isolate lobster landings.

Additional lobster landings data for Newfoundland, and for the Province of Quebec, from 1969-77, were obtained from Economics Branch, Ottawa, in order to obtain a complete breakdown by Sea Fisheries District. From 1978 through 1983, Economics Branch, St. John's, Newfoundland, supplied lobster landings for that province, while lobster landings for the Province of Quebec for those same years were provided by the Quebec Department of Trade and Commerce. From 1984-89, all data for the Province of Quebec were provided by Statistics Branch, Quebec*. For the same period, statistics on the portion of lobsters landed in the Newfoundland Region were obtained from Statistics Branch, St. John's, whereas data on the portion of Newfoundland lobsters landed in the Gulf Region were provided by Statistics Branch, Moncton.

From 1977 through 1983, Statistics Branch, Halifax, provided lobster landings for all Sea Fisheries Districts in the three Maritime Provinces (i.e. Nova Scotia, New Brunswick, Prince Edward Island). However, with the formation of the Scotia-Fundy and Gulf Regions in 1983, Statistics Branch, Halifax, only recorded lobster landings for the Scotia-Fundy Region. Hence, data from 1984-89 for Sea Fisheries Districts in the Gulf Region were obtained from Statistics Branch, Moncton.

---

*Appendix 1 contains names and addresses of personnel in the Statistics Branch of each region from whom current data can be acquired (contact names as of January 1, 1992).

GEOGRAPHICAL BOUNDARIES

In Atlantic Canada, Lobster Fishing Districts (LFD's) were established in 1910 (Fig. I). A new area management system was introduced in January 1986, consisting of 41 Lobster Fishing Areas (LFA's) (Fig. II). Although most LFA's contain the same Statistical Districts as the earlier LFD's, some LFD's were subdivided to form two or more LFA's (e.g. LFD 10a became LFA's 15, 16 and 18) and a new numbering system was assigned to each LFA (Fig. I, II). The new LFA system also introduced distinct offshore boundaries for lobster Fishing areas, replacing the previous system which defined Fishing Districts by reference to coastal features only.

Lobster landings from 1892-1946 were recorded by county. From 1947-89, landings were recorded by Sea Fisheries District (i.e. Statistical District [SD]) (Fig. III-VII). Landings for the various geographical areas listed in this report have been derived by summation of the published data for the appropriate Sea Fisheries Districts and/or counties for each area, and are specified, when appropriate, in parentheses after the Table headings (e.g. Table 52. Lobster District 7B [Nova Scotia (N.S.) SD's 2, 3, 10, 11, 12, 13, 46 and Kings, Queens Cos, P.E.I.]). Lobster landings in Table 42 (Lobster District 3) and Table 44 (Lobster District 4A) for N.S. Sea Fisheries District 38 have been split (D. Graham, 76 William St., St. Andrews, N.B., E0G 2X0, pers. commun.), with one-third of the landings being attributed to fishermen in Lobster District 3 and the remaining two-thirds to the fishermen of Lobster District 4A. The only other approximation of lobster landings is in Table 230 where landings for APPROXIMATE SCOTIA-FUNDY REGION from 1947-83 were calculated based on the boundaries of the present day Scotia-Fundy Region created in 1984 (Fig. VIII, Table 231). The percentages used for calculations of lobster landings in Table 230 (1.5% - SD 3, 20.5% - SD 1, 66.6% - SD 14) are means derived from accurate landing data collected between 1984 and 1989 (Table 231).

FORMAT

Figures I-VIII are maps depicting the boundaries for geographical areas used in the tables and figures contained in this report. Appendix 2 contains addresses for Area Managers' offices from which information can be obtained on the specific location of boundaries between Sea Fisheries Districts and Lobster Fishing Areas, as well as data on the opening and closing dates of lobster fishing seasons for each area (contact names as of January 1, 1992).

This report contains a total of 236 tables of lobster landings information for defined geographical areas (listed in the index). A total of 89 figures, representing commonly requested geographical area breakdowns, are included for visual inspection of lobster landing trends. For consistency, figure numbers correspond to the table number containing the data. Thus, figures are numbered 1-39 and 180-229 because data in Tables 40-179 and 218A and B are not plotted as figures.

Further inquiries on the lobster landings data presented in this report should be directed to Dr. Peter Lawton, or to Mr. David Robichaud, Department of Fisheries and Oceans, Biological Station, St. Andrews, N.B. E0G 2X0.

ACKNOWLEDGMENTS

The author is indebted to S. Fawkes and to G. Fawkes for provision of advice in the compilation of the landings database from which this report was produced, to D. Robichaud for the French translation of the abstract, to Dr. P. Lawton and D. Robichaud for advice on text and figures, and to personnel of the Economics and Statistics Branches of the Government of Canada in Ottawa, Halifax, Moncton, Quebec and Newfoundland for providing data.

Note: A. M. Williamson completed a draft manuscript of this report, inclusive of the tabular and illustrative material, prior to her retirement from the Public Service in 1991. Final editing and production of the report were undertaken by P. Lawton and D. A. Robichaud. We would like to take this opportunity to acknowledge Anne Williamson's contribution to the work of Departmental fisheries scientists in the Canadian Maritimes.
